

PhishMe Research determined that ransomware accounts for more than 97% of all phishing emails in 2016. With such alarming numbers, how do you prevent your enterprise from becoming another statistic? PhishMe Simulator empowers employees to become your last line of defense with industry-proven behavioral conditioning methods to better prepare employees to recognize and resist malicious phishing attempts—transforming one of your biggest liabilities into your strongest defense.

Why choose PhishMe Simulator™?

PhishMe has been proven to reduce the threat of employees falling victim to advanced cyber attacks by up to 95% – preparing your last line of defense to recognize and resist tricky phishing attempts.

Key Benefits

- ✓ Reduce organizational susceptibility to phishing attacks by more than 95% through immersive training exercises
- ✓ Simulate the latest attack tactics with customizable scenario and training templates
- ✓ Employ differentiated learning techniques from a continuous library of multilingual content
- ✓ Validate program efficacy and identify areas of risk with detailed reporting

What is PhishMe Simulator™?

Simulator is a purpose-built SaaS platform that improves employee response to phishing attacks and empowers employees to provide real-time threat intelligence by immersing them in a real-world spear phishing experience. The solution's customizable scenarios focus on emulating the most relevant threats and providing in the moment feedback and education to recipients who fall victim to these exercises.

Our patented technology provides an unmatched range of cyber attack themes, content and customization, and delivers detailed analysis and reporting for each scenario. PhishMe's world class customer support ensures exercises are conducted in a controlled manner that does not compromise security or create negative backlash.

How does it work

PhishMe's Enhanced Analytics reporting is invaluable. Using that data, we were able to modify our phishing defense programs with more targeted education, specifically for those employees with high click rates in an effort to reduce that number.

Jim Stewart, CISO, United Community Bank

Customizable Content and Relevant Training

Simulator scenarios can be customized to simulate a variety of attack techniques including drive-by, malware, and social engineering attacks, as well as more advanced tactics such as conversational phishing and highly personalized spear phishing. Additionally, customers can run scenarios to benchmark their progress against PhishMe's growing number of customers.

Customers can build their own scenarios or use one of dozens of customizable pre-built templates. Our expanding library of content covers a multitude of security topics such as phishing, security awareness, compliance, and social media in various formats, including HTML5 templates, videos, and a game module. With multilingual content and education, PhishMe addresses the diverse cultural needs of regional and global businesses.

For organizations that require more comprehensive training, PhishMe offers fully SCORM compliant educational content that covers general security topics.

Available training covers the following topics:

- Spear phishing awareness
- Malicious links
- Malware
- Password security
- Data protection
- Mobile devices
- Safer web surfing
- Social engineering
- Social networking
- Physical security
- Working outside the office
- Reporting suspicious activity
- Ransomware
- Business Email Compromise (BEC)
- Advanced spear phishing

Secure Delivery Platform

Our SaaS platform is deployed in a Tier III SOC 2 and SOC 3 certified facility in the United States and an ISO9001:2008 certified facility in Europe. Both are

regularly externally pentested and feature robust access controls. All data is encrypted at rest, and PhishMe never collects sensitive data from customers during data-entry scenarios.

Detailed Analytics

Each scenario provides metrics to track a multitude of data points that, when analyzed over time, provide insight into organizational susceptibility and offer a path for continuous improvement.

Simulator's reporting tracks, for example:

- Geolocation
- Timestamps
- Individual responses
- Trends
- Time spent on training
- Time to first report (Reporter required)
- Browser enumeration
- Organizational Resiliency (Reporter required)

Ensure Customer Success

Each Simulator license includes access to PhishMe's world class customer support. In addition to ensuring proper delivery of email-based scenarios, our support team provides expert advice for implementing Simulator, reviewing email scenarios against industry best practices, tailoring the program to an organization's culture, leadership, and user base, and providing assistance for new features and scenarios.

If resources are limited, organizations can also leverage Simulator as a partially or fully-managed solution with a dedicated professional assigned to their account who creates, executes, and analyzes the results of campaigns. Programs are customized for an organization's requirements and culture.

PhishMe is the leading provider of human-focused phishing defense solutions for organizations concerned about their susceptibility to today's top attack vector – spear phishing. PhishMe's intelligence-driven platform turns employees into an active line of defense by enabling them to identify, report, and mitigate spear phishing, malware, and drive-by threats. Our open approach ensures that PhishMe integrates easily into the security technology stack, demonstrating measurable results to help inform an organization's security decision making process. PhishMe's customers include the defense industrial base, energy, financial services, healthcare, and manufacturing industries, as well as other Global 1000 entities that understand changing user security behavior will improve security, aid incident response, and reduce the risk of compromise.
