

PhishMe® Integration Brief

PhishMe Intelligence, PhishMe Triage, and Recorded Future

PhishMe and Recorded Future integrate for immediate visibility into your biggest cybersecurity risk – spear phishing. Pivoting between PhishMe and Recorded Future extracts valuable insights analysts need to impede phishing attacks that have led to over 90% of the data breaches. This partnership combines human-verified and employee-reported phishing in tandem with real-time threat intelligence analyzed from the open, deep, and dark web. The end result is a more formidable approach to combat phishing threats and minimize risk of data breaches.

Operationalize Phishing Intelligence and Incident Response

- ✓ Analyze across open, deep, and dark web real-time intelligence, correlate IoCs with human-verified criminal infrastructure
- ✓ Seamlessly navigate between Recorded Future and PhishMe
- ✓ Use of API-accessible relevant and contextual phishing IoCs with no false positives
- ✓ Verified high fidelity intelligence about phishing, malware, and botnet infrastructure
- ✓ Human-readable PhishMe reports to understand attacker TTPs
- ✓ Link reported events to real-time intelligence as attackers transform their operation
- ✓ Mutually-supported SIEM integrations

Real-Time Phishing Threat Intelligence and Incident Response

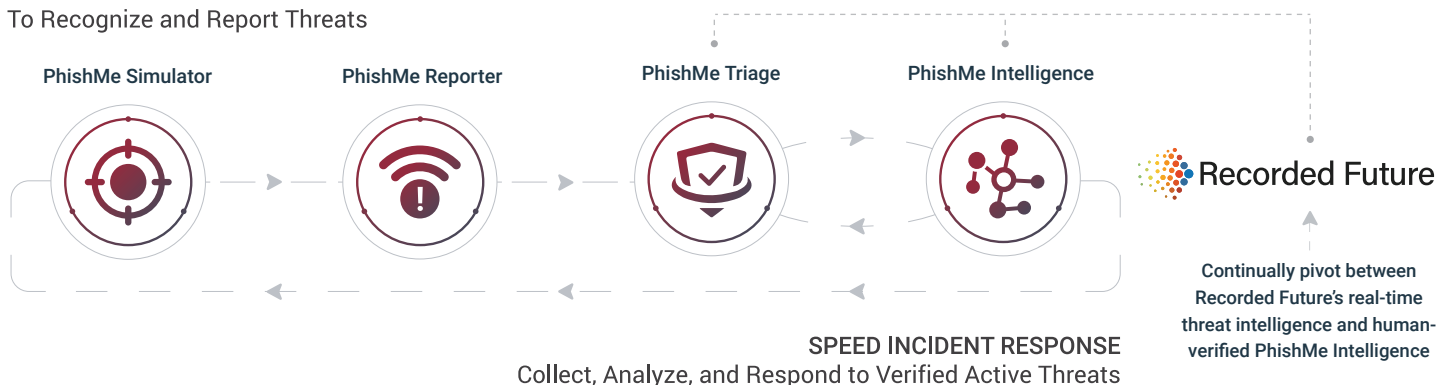

PhishMe comprehensive human phishing defense platform focuses on fortifying your employees – your last line of defense after a phish bypasses other technologies – and enabling incident response teams to better identify, verify, and respond to targeted phishing attacks.

The powerful combination of PhishMe Simulator and PhishMe Reporter conditions employees to resist phishing attempts and empowers them to become part of the defense by reporting potentially malicious phishing attacks in real time.

PhishMe Triage enables IT security teams to automate and prioritize reported threats to speed incident response. PhishMe Intelligence provides security teams with 100% human-verified phishing threat intelligence.

The integration of PhishMe’s human phishing defense solutions and Recorded Future’s real-time threat intelligence from the web, delivers more efficient prevention and containment of phishing threats.

CONDITION EMPLOYEES To Recognize and Report Threats

Recorded Future

The mission is to empower customers with real-time threat intelligence, to defend their organizations against threats at the speed and scale of the Internet. With billions of indexed facts, and more added every day, Recorded Future's patented Web Intelligence Engine continuously analyzes the entire web to give analysts unmatched insight into emerging threats.

Recorded Future helps protect four of the top five companies in the world, and over 12,000 IT security professionals use Recorded Future every day. Recorded Future enables analysts to capture and exploit relevant threat intelligence from the entire web, in real time.

This is made possible by Recorded Future's patented Web Intelligence Engine, which structures the latest content from the open, deep, and dark web into highly contextualized threat intelligence. As a result, analysts get the benefit of prioritizing their efforts where it matters most.

PhishMe Triage and Recorded Future

PhishMe Triage contains multiple integrations to enable security teams to spontaneously organize, analyze, and respond to suspiciously-reported employee emails. Mutual PhishMe and Recorded Future customers can conduct deeper investigations by linking into Recorded Future from Triage for additional threat analysis on the indicators received.

PhishMe Triage collects and prioritizes internally-generated phishing attacks from PhishMe Reporter and security teams can use Recorded Future's real-time intelligence to reference IP addresses, domains, and file hashes (example).

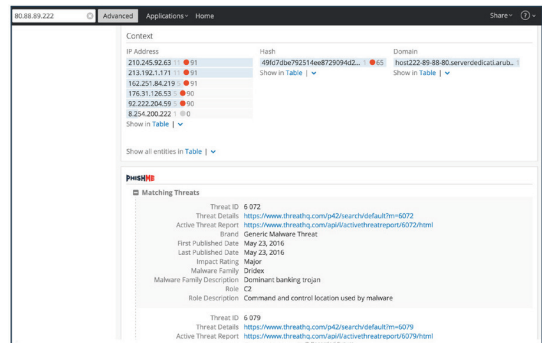

Together, PhishMe and Recorded Future deliver security teams the ability to traverse solutions that complement each other. The combination of real-time threat intelligence backed by human-verified phishing threats uniquely brings a global holistic view to threats facing organizations.

PhishMe Intelligence and Recorded Future

PhishMe Intelligence and Recorded Future provide analysts with the ability to effortlessly cross reference between each solution to research indicators. An analyst investigating phishing activity within Recorded Future can instantly cross-examine using PhishMe's API against IPs, domains, or hashes. Analysts can quickly validate their research in tandem with PhishMe's human-verified intelligence and access contextual reports that provide organizations insight into the criminal infrastructure. Likewise, the analyst can connect back into Recorded Future to continue following the trail of bits from the open, dark, and deep web. Security teams gain time and insight from the ability to seamlessly move between their intelligence sources.

PhishMe's Intelligence exposes IoC data such as:

- **IOC Type:** URL, File Hash, IP Address, Domain
- **Infrastructure Type:** C2, Payload, Exfiltration
- **Malware Family**
- **Published Date**
- **Impact Rating**
- **Malware Description**
- **Threat Report Links**
- **Threat ID**

About Recorded Future

Recorded Future arm you with real-time threat intelligence so you can proactively defend your organization against cyber-attacks. Indexing billions of facts, our patented Web Intelligence Engine continuously analyzes the entire Web, giving you unmatched insight into emerging threats. We help protect four of the top five companies in the world.

PhishMe is the leading provider of human-focused phishing defense solutions for organizations concerned about their susceptibility to today's top attack vector – spear phishing. PhishMe's intelligence-driven platform turns employees into an active line of defense by enabling them to identify, report, and mitigate spear phishing, malware, and drive-by threats. Our open approach ensures that PhishMe integrates easily into the security technology stack, demonstrating measurable results to help inform an organization's security decision making process. PhishMe's customers include the defense industrial base, energy, financial services, healthcare, and manufacturing industries, as well as other Global 1000 entities that understand changing user security behavior will improve security, aid incident response, and reduce the risk of compromise.
